

Dealer saves 1,000 hours per month with kiosks

MARTIN GARCIA

General Manager,
Texas Auto Center

“

For years, we struggled with cashier turnover at Texas Auto Center. Our customers wanted more options, and we wanted to improve efficiencies.

That's when we learned about QuotePro's payment kiosks. Since implementing the kiosks a year ago, we've seen:

- An average savings of 1,000 staff hours per month, and that doesn't even count our new location
- An immediate switch to 80–90 percent of customers paying cash, which saves on fees from debit cards and money orders
- Increased accountability for customers, since they fully control the payment process with no chance for cashier error

Our kiosks lowered costs while increasing convenience for everyone. In addition, QuotePro's client service after the sale has been impeccable. That's why, when we acquired another car lot this past year, one of our first priorities was to install more kiosks.
